

① Fold the paper in half.

② Unfold the paper and cut it in half along the crease to make two pieces.

③ Get one of the pieces of paper and fold a small part over, it doesn't matter too much how much you fold, as long as it is less than half.

④ Unfold the paper and cut along the crease. Get rid of the smaller strip - you won't need it.

⑤ You should now have 2 pieces, one bigger than the other. We will use the shorter piece first.

⑥ Lay the paper in front of you so that the longest sides are in front and the shorter sides are on the side.

- ⑦ Fold the paper in half and then unfold it.

- ⑨ Repeat step 8 again to create a smaller rectangle.

- ⑪ On each end fold one corner into the middle to make a small triangle.

- ⑧ Fold the paper in to the middle crease on both sides so you have two smaller rectangles.

- ⑩ Fold the rectangle in half from the shortest side to the other short side and unfold.

- ⑫ Fold each end in, keeping the triangles folded.

- (13) Unfold the triangles so that the ends are just small rectangles folded in.

- (15) Put that piece to the side for now and place the larger rectangle piece in front of you. Repeat steps 7 to 9 on this piece.

- (17) Unfold the triangles and unfold the last folds you did into the middle as well. Fold the triangle creases inwards while folding the long side back into the middle. Your paper should look like the picture on the side with the triangles now on the inside of the folds.

- (14) Fold each side into the middle so they reach the middle crease.

- (16) Fold triangles in on each side, you should have two pointy ends and four triangles.

* Triangles should be on the inside now.

18 Pick up the first piece you folded up and place it under the long piece, making sure the side with all the folds is facing up for both pieces.

* Make sure the longer piece is on top of the shorter one.

20 Get each end of the long piece and fold them into the middle, tucking the two triangles that aren't connected to each other under each section of the smaller piece.

* Tuck under the fold.

19 Bring the shorter piece in on the folds you've already made and tuck the folded ends into the folds of the longer piece. Move the short piece along the long piece to a place you're happy with, making sure one side is shorter than the other. (Like a cross).

* Tuck under the fold.
Do to both sides.

21 You did it! Good job!

* If you got completely lost by my instructions just google 'cross origami' for videos to help you out! ;)
